**Introduction:**

In recent years, various products containing synthetic cannabinoids (e.g., JWH-018, UR-144, AKB48, etc.) laced on plant material have been encountered by law enforcement and are smoked for their psychoactive effects. In response to Federal control of these synthetic cannabinoids, a transition to new synthetic cannabinoids laced on plant material has been observed. 4-CN-CUMYL-BUTINACA is a synthetic cannabinoid recently encountered on the designer drug market and has been found laced on plant material and marketed under the guise of herbal incense products.

**Chemistry:**

The chemical structure for 4-CN-CUMYL-BUTINACA is shown below.

![Chemical Structure](image)

4-CN-CUMYL-BUTINACA is classified as an indazole. 4-CN-CUMYL-BUTINACA is based on an indazole core structure where the 1- and 3-positions of the indazole ring system are substituted. The 1-position of 4-CN-CUMYL-BUTINACA is substituted with a linear four carbon chain terminated with a cyano (CN) group. The 3-position is substituted with an amide linker, and the nitrogen atom (N) of this linker is further substituted with a 2-phenyl-propan-2-yl group.

**Pharmacology:**

Data from preclinical studies show that 4-CN-CUMYL-BUTINACA binds to and acts as an agonist at the CB1 receptor.

There are no published studies on the safety of 4-CN-CUMYL-BUTINACA for human use.

---

1 Chemical name: 1-(4-Cyanobutyl)-N-(2-phenylpropan-2-yl)-1H-indazole-3-carboxamide

---

**Licit Uses:**

There are no commercial or medical uses for 4-CN-CUMYL-BUTINACA.

**Illicit Uses:**

4-CN-CUMYL-BUTINACA has been encountered in numerous synthetic cannabinoid products that are smoked for their psychoactive effects.

**User Population:**

Information on user population in the U.S. is limited. 4-CN-CUMYL-BUTINACA abuse is not monitored by any national drug abuse surveys. Poison control centers continue to report adverse health effects in response to the abuse of synthetic cannabinoids and this abuse is both a public health and safety concern. Serious adverse effects including death have been reported following the use of 4-CN-CUMYL-BUTINACA.

**Illicit Distribution:**

The National Forensic Laboratory Information System (NFLIS), a system that collects drug analysis information from state and local forensic laboratories, contain 654 reports for 4-CN-CUMYL-BUTINACA between 2016 and 2018.

**Control Status**

4-CN-CUMYL-BUTINACA is a Schedule I controlled substance under the Federal Controlled Substances Act.
