

The United States Department of Justice
Drug Enforcement Administration

Methamphetamine and the CMEA

Pharmacy Diversion Awareness Conference

Louisville, Kentucky
November 16 & 17, 2013

Thomas W. Prevoznik
Staff Coordinator—Liaison Section
Office of Diversion Control

Question #1

The purpose of the CMEA is to limit the domestic manufacture of methamphetamine by placing restrictions on the sale of Pseudoephedrine, ephedrine and phenylpropanolamine at retail outlets.

True or False

Question #2

Someone who buys small quantities of ingredients (e.g., PSE, ice packs, lithium, matches, iodine), from several different locations, in order to manufacture, or more likely, assist in the manufacture of methamphetamine is called a _____.

- a. Kentucky Wildcat
- b. Louisville Cardinal
- c. Smurf
- d. Trifecta

Methamphetamine Facts

Schedule II controlled substance

Methamphetamine is the most widely abused, domestically produced synthetic drug in the United States.

It is used across all genders, ages, and socio-economic levels.

Has a high rate of addiction, a low rate of sustained recovery, and is relatively inexpensive to manufacture.

U.S. Methamphetamine Problem

The U.S. methamphetamine threat is a two prong problem:

- Methamphetamine manufactured by Mexican Trafficking Organizations (large “Super Labs” in Mexico & the U.S.)
- Small Capacity Production Labs (SCPLs) (based in the U.S.)

I'M MAKING METH

MORE WATERMARKS @ DAMNLOL.COM

Foreign vs. Domestic Methamphetamine

Methamphetamine from foreign
trafficking organizations

P2P vs. PSE/EPH

P2P Route Affects Potency

- Ephedrine and Pseudoephedrine-based routes always produce “potent” meth (d-meth only)
 - Predominant method prior to 2006
 - Still used today in small, domestic labs (one pot, Smurfing)
- P2P-based routes form “less-potent” methamphetamine
 - Half of the sample is d-meth and half is l-meth
 - l-meth 2 to 10 times less potent than the d-isomer
 - At high doses, l-meth stimulant effects are similar to d-meth but are short lived (**therefore, l-meth not preferred by users**)*

*Human pharmacology of the methamphetamine stereoisomers, J. Mendelson, MD, et al, Clin Pharmacol Ther **2006**:80:403-420.

Methamphetamine Seizures Along the U.S. SW Border (Kilograms)

Source: NSS-EPIC

Query Date: January 29, 2013

Statistics are for Texas, New Mexico, Arizona and California.

Domestic Methamphetamine

Domestic Meth

- The New Methamphetamine
 - 3 to 4 times easier to make and 3 to 4 times more potent than the old drug
 - Common chemicals purchased over the counter
 - 1 to 4 hours to cook a batch (old method took 20 hours)
 - Accounts for 98% of all reported clandestine labs. EPIC 2004

Why do we have the CMEA?

Domestic Chemical Trafficking

What is the purpose of the
CMEA?

To limit the domestic
manufacture of
methamphetamine by placing
restrictions on the sale of
Pseudoephedrine, ephedrine and
phenylpropanolamine at retail
outlets.

What information must be in the logbook?

- You must keep a logbook which contains a written or electronic list of sales of drug products containing ephedrine, pseudoephedrine, and phenylpropanolamine.
- You must write or enter in the logbook the name of the drug product and the quantity sold.
- Your customer must write or enter in the logbook their name and address, and the date and time of the sale.
- Your customer must also sign the logbook (signature).

Identification and Verification

- Your customer must show you a photo identification issued by a State or the federal government. If your customer does not have a photo identification, ask your supervisor for help.
- You cannot sell Scheduled Listed Chemical Products containing ephedrine, pseudoephedrine, or phenylpropanolamine to customers unless they present appropriate identification.
- You must verify that your customer's name on the photo identification matches the name your customer wrote in the logbook.
- You must verify that the date and time of the sale that your customer wrote in the logbook are correct.

When is my customer NOT required to sign the logbook?

- If your customer buys a single package containing not more than 60 milligrams of pseudoephedrine* (one 60 mg tablet or two 30 mg tablets)
 - Your customer does not have to sign the logbook.
 - Your customer does not have to show identification.

*** Note: does not apply to ephedrine or phenylpropanolamine**

Who can see the logbook information?

- You must keep the logbook secure.
- You may share information in the logbook:
 - To comply with the law; and
 - For a product recall.
- Logbook information may only be shown to local, state and federal law enforcement.
- Information in the logbook may be copied, inspected only, or turned over entirely.
- Ask your supervisor for further information about sharing information.

How do I store these drug products?

- You must store drug products containing ephedrine, pseudoephedrine, and phenylpropanolamine either behind the counter or in a locked cabinet.
- You must give the drug product directly to the customer who signed the logbook.

How much of these drug products can I sell to each customer per day?

- You cannot sell more than 3.6 grams per day to each customer of Scheduled Listed Chemical Products containing ephedrine, pseudoephedrine or phenylpropanolamine.

How much of these drug products can my customer buy in a 30-day period?

- Your customer cannot buy more than 9 grams in a 30-day period of Scheduled Listed Chemical Products containing ephedrine, pseudoephedrine, or phenylpropanolamine.

Kentucky More Restrictive

- Reduces monthly limit from 9 grams to 7.2 grams without a prescription
- Annual limit set at 24 grams without a prescription
- Age restriction set---no one under 18 (w/RX)

Kentucky More Restrictive

- Prohibits individuals convicted of offense relating to methamphetamine from possessing or attempting to possess for 5 years after the following dates:
 - date of conviction;
 - discharged from incarceration: or
 - date released from probation or parole

Meth's Effects

Psychological Effects

- **Delusions**
- **Extreme paranoia**
- **Hallucinations**
- **Increased alertness**
- **Sense of well-being**
- **Prolonged depression**
- **Excessive excitation and talking**
- **Panic**
- **Anxiousness and nervousness**
- **Moodiness and irritability**

Meth Addiction

- When compared to Alcohol and Cocaine:
 - A group of 100 people given a drink of alcohol every day for 3 weeks, **8 of the 100** will become addicted.
 - A group of 100 people given meth or cocaine orally or as snuff every day for 3 weeks, **14 of the 100** will become addicted.
 - A group of 100 people given meth by smoking or injection just 2 times, **90 of the 100** will become addicted.
 - If a recovering meth addict, who has been clean for 11 months, has a hit of meth in placed in front of them, the desire to use it will cause the addict to use it, **100%** of the time.

Meth Labs are Costly to Our Counties, State & Government Vanderbilt Burn Center

“Every day we beat our heads against the wall, dealing with these people,” said Kim Hayes, a registered nurse and case manager at the burn unit. “Right now, there are no consequences for these people. You blow yourself up in a meth lab. You get free health care because we are going to take care of you. We’re going to give you everything you need. You’re going to go out. You’re going to do it again and then we’ll give you everything for free again.”

www.tennessean.com September 5, 2011

◀ An individual suffering from "crank bugs", a condition sometimes seen in cases of heavy methamphetamine abuse. A similar condition, called "coke bugs" or "snow bugs", is also seen in heavy cocaine users. This is a drug induced hallucination or sensation that bugs are crawling on or under the skin. The abuser picks at the skin in an attempt to remove the bugs. The individual pictured had similar marks on his legs, face, chest and back.

Tennessee Lab Incidents / Arrests Comparison 1999-2010

Why Pseudoephedrine or
Ephedrine to Make
Methamphetamine?

What's the Big Deal with Pseudoephedrine?

Molecular Comparison

Pseudoephedrine

Methamphetamine

What's the big deal with Pseudoephedrine? The answer is basically **One Oxygen Molecule**. The molecular similarity of pseudo to meth is so close that using today's common methamphetamine manufacturing methods ("Shake & Bake" Red-Phosphorus or Anhydrous / Nazi method) simply reduce the molecular structure of pseudoephedrine/ ephedrine by one Oxygen molecule to create Methamphetamine.

One Pot Meth Production

- Combine
 - PSE tablets – whole or ground up
 - Solvent – ether, camp fuel
 - Lithium (Batteries)
 - Sodium Hydroxide
 - Ammonium Nitrate (cold packs)
 - Water
- Exothermic Reaction
 - Filter off liquid
 - Use HCl generator to crash out Meth

And it all begins with Smurfing!!

*2009 Rand Study

What is a Smurf?

- A smurf is someone who buys small quantities of ingredients (e.g., PSE, ice packs, lithium, matches, iodine), from several different locations, in order to manufacture, or more likely, assist in the manufacture of methamphetamine.

The Source for Pseudoephedrine –“Smurfing”

Pseudoephedrine blister packs

Lithium from Batteries

Provided by: Shelby County Sheriff's Office

Tracking vs. Scheduling

Tracking

- Logbooks electronically connected to database
- Database determines if individual can make purchase
- Permanent electronic record of purchase
- Stop sale ability
- Helps LE identify smurfers
- Leads to identification of lab operators and labs
- More arrests and seizures....maybe
- Great tool for LE If all retail outlets are involved and the database is not corrupted by false IDs
- In Place - KY, MO*, AR*, CA*, ++++++

Schedule III Prescription Only

- PSE and EPH can only be obtained pursuant to prescription from a physician or practitioner
- Cannot freely purchase from retail outlets - ends unrestricted availability and smurfing
- If a CS, PDMP may be utilized for tracking purposes (if authorized by state law or regulation)
- In place in Oregon – 96% lab seizure reduction
- In place in Mississippi – 67% reduction
- Decrease in labs leads to a decrease in resources expended – LE and local/city/state funds (OT, lab cleanups, environmental issues, children/defs/citizens/cops health care, foster care etc)
- LE can restructure resources to handle other LE issues instead of providing cleanup service and chasing smurfers
- Prevents labs – is not a reactive tool, but a preventative measure

What will the lobbyists tell you?

Parade of Horribles...

- Public outcry
- Inconvenience
- Medicaid costs
- Impact on poor
- **Won't work**
- Electronic tracking will reduce labs
- Tracking is free
- Tracking stops smurfs

DISCLOSURE – NEITHER of these
Systems will have ANY impact on
Methamphetamine Availability in
the United States!!!!!!

OREGON METH LAB INCIDENTS

* 2005: Oregon law requiring placement behind the counter, photo ID, and logging effective May 14, 2005.

* Oregon prescription-only law became effective 7/1/2006.

What happened when Oregon re-scheduled PSE...

- Appx. 80 other over the counter cold and allergy medications are available for purchase
- Legitimate users can still get medication when needed
- Most MDs are willing to call in scrip rather than require an office visit
- Price of PSE did not go up
- Oregon Medicaid's increase due to PSE = \$7,780
- Violent crime has decreased 10.6%
- Property crime has decreased 6.9%
 - 2007 to 2008 FBI stats, *The Oregonian* 9-14-09
- Eliminated smurfing
- Near elimination of labs
- All drug arrests are down
- Mississippi passed CIII in their 2010 session
- Cities and Counties in Missouri are passing CIII local ordinances

Oregon vs. Kentucky

Meth Lab Incidents*

Comparing Oregon and Kentucky trend lines

	2000	2001	2002	2003	2004	2005	2006	2007	2008	2009
Oregon	351	587	525	419	472	189	55	22	21	10
Kentucky	104	175	373	485	571	574	343	294	416	716

* Per EPIC for 2000-2008. 2009 is directly from Oregon and Kentucky. NOTE: The Kentucky number may go higher due to late reporting.

Mississippi: 6-Month-Old Law to Combat Meth Production Lauded Jan. 4, 2011

After just six months, a new law requiring a prescription for cold and sinus medicines containing pseudoephedrine **has proved to be an effective deterrent to methamphetamine production in Mississippi.**

“Early results show a nearly 70 percent reduction in meth-related cases statewide. Now when we find pseudoephedrine at meth labs, it was purchased in surrounding states,” explained Director Fisher.

Figures from the MBN indicate officers worked **124** meth labs from July to December 2010, a **68 percent reduction** from the **389** meth labs they worked from July to December 2009.

Officials removed **19** children from meth lab sites July to December 2010, a **76 percent reduction** from the **80** children removed from meth lab sites July to December 2009.

“Other states are looking to follow Mississippi’s lead and pass the same law. This works; I hope they do,” Director Fisher said.

(Associated Press) “Analysis Finds Meth Flourishes Despite Tracking Laws”

“Electronic systems that track sales of the cold medicine used to make methamphetamine have failed to curb the drug trade and instead created a vast, highly lucrative market for profiteers to buy over-the-counter pills and sell them to meth producers at a huge markup.”

“The pharmaceutical industry has spent several million dollars to fund the tracking systems. For drug makers, that is far cheaper than one alternative -- making the medication available only by prescription. If more states do the same, it could be devastating for makers of cold and sinus pills. The pseudoephedrine market is estimated at more than \$550 million annually. “

Methamphetamine Laboratories are Harming Our Children & Costly Missouri

Statewide, there were 547 substantiated reports involving 987 children exposed to meth labs from January 2006 to December 2010, according to the Missouri Department of Social Services. The state took custody of 507 of these children. DSS estimates the state has spent about \$3.4 million providing custodial care to children removed from meth homes from August 2005 to December 2010.

DEA Web-based Resources

www.DEA.gov

The screenshot displays the DEA website homepage. At the top, the URL is <http://www.justice.gov/dea/index.shtml>. The main header features the large "DEA" logo in gold, followed by "UNITED STATES Drug Enforcement Administration" and the tagline "TOUGH WORK, VITAL MISSION". A navigation menu includes links for HOME, ABOUT, CAREERS, OPERATIONS, DRUG INFO, PREVENTION, and PRESS ROOM. The central banner area contains the text "Tough Work, Vital Mission The Facts About DEA" and the official DEA seal. To the right of the seal are three featured resource boxes: "Drug Facts for Today's Teens" (JustThinkTwice.com), "A DEA Resource for Parents" (GetSmartAboutDrugs.com), and "Wall of Honor" (DEA Remembers). Below the banner are three columns: "TOP STORY" with a headline "Couple Handed Lengthy Sentences in International Cocaine Trafficking Conspiracy" dated "JAN 29 (BROWNSVILLE, TEXAS)"; "TOPICS OF INTEREST" listing "DEA Fact Sheet", "Drugs of Abuse: A DEA Resource Guide", "Extension of Temporary Placement of Five Synthetic Cannabinoids", and "The DEA Position on Marijuana"; and "RESOURCE CENTER" listing "Controlled Substances Act", "DEA Museum and Visitors Center", "Doing Business with DEA", "Drug Disposal", and "Employee Assistance Program".
