

Combat Methamphetamine Epidemic Act

*Diversion Investigator
George Lutz
802-951-2916*

Goals and Objectives

- Discuss methamphetamine background and the scope of the problem as related to manufacture and abuse
- Identify and discuss the pharmacology of methamphetamine
- Discuss the Combat Methamphetamine Epidemic Elimination Act
- Discuss smurfing and diversion of Small Capacity Production Labs
- Discuss methamphetamine manufacture and the dangers associated with methamphetamine production

Questions to Discuss

- True or False....
 - The Combat Methamphetamine Epidemic Elimination Act was passed to limit the amount of ephedrine, pseudoephedrine, and/or Phenylpropanolamine available to clandestine laboratory operators who manufacture controlled substances such as methamphetamine and amphetamine.

True

Questions to Discuss

- Which of the following drugs are not covered under the Combat Methamphetamine Epidemic Elimination Act as Scheduled Listed Chemical Products?
 - A) Ephedrine
 - B) Pseudoephedrine
 - C) Phenylephrine
 - D) Phenylpropanolamine

C) Phenylephrine

Questions to Discuss

- True or False....
 - The easiest method of methamphetamine manufacture is through the “one-pot” method using pseudoephedrine or ephedrine.

True

*Foreign vs. Domestic
Methamphetamine*

U.S. Methamphetamine Problem

- The U.S. methamphetamine threat is a two prong problem:
 - Methamphetamine manufactured by Mexican Trafficking Organizations (large “Super Labs” in Mexico & the U.S.)
 - Small Capacity Production Labs (SCPLs) (based in the U.S.)

Seizures of Methamphetamine along the SWB

EPIC SOUTHWEST BORDER METH STATS (CA, AZ, NM, TX)

YEAR	KILOGRAMS SEIZED
CY 2001	1,879.41 KG
CY 2002	1,217.69 KG
CY 2003	1,965.56 KG
CY 2004	2,436.97 KG
CY 2005	3,041.42 KG
CY 2006	2,875.07 KG
CY 2007	1,885.96 KG
CY 2008	2,236.74 KG
CY 2009	3,534.19 KG
CY 2010	5,513.76 KG
CY 2011	8,589.12 KG
CY 2012	12,541.87 KG
CY 2013	14,576.80 KG
CY 2014	16,139.68 KG
CY 2015	17,884.53 KG

United States Meth Lab Incidents

Domestic Meth

- Today's Home-Grown Methamphetamine
 - 3 to 4 times easier to make and 3 to 4 times more potent than the old drug
 - Common chemicals purchased over the counter
 - 1 to 4 hours to cook a batch (old method took 20+ hours)
 - Accounts for 98% of all reported clandestine labs.

*Why do we have the
CMEA?*

Domestic Chemical Trafficking

What is the purpose of the CMEA?

To limit the domestic manufacture of methamphetamine by placing restrictions on the sale of Pseudoephedrine, ephedrine and phenylpropanolamine at retail outlets.

What information must be in the logbook?

- You must keep a logbook which contains a written or electronic list of sales of drug products containing ephedrine, pseudoephedrine, and phenylpropanolamine.
 - You must write or enter in the logbook the name of the drug product and the quantity sold.
 - Your customer must write or enter in the logbook their name and address, and the date and time of the sale.
 - Your customer must also sign the logbook (signature).

Identification and Verification

- Your customer must show you a photo identification issued by a State or the federal government.
- Alternate Forms of Identification are allowed by 8 CFR 274a.2(b)(1)(v)(A) and 274a.2(b)(1)(v)(B) and include but are not limited to:
 - United States passport (unexpired or expired).
 - Alien Registration Receipt Card or Permanent Resident Card, Form I-551.
 - An unexpired foreign passport that contains a temporary I-551 stamp.
 - An unexpired Employment Authorization Document issued by the Immigration And Naturalization Service which contains a photograph, Form I-766; Form I-688, Form I-688A, or Form I-688B.

Identification and Verification

- You cannot sell Scheduled Listed Chemical Products containing ephedrine, pseudoephedrine, or phenylpropanolamine to customers unless they present appropriate identification.
- You must verify that your customer's name on the photo identification matches the name your customer wrote in the logbook.
- You must verify that the date and time of the sale that your customer wrote in the logbook are correct.

When is my customer NOT required to sign the logbook?

- If your customer buys a single package containing not more than 60 milligrams of pseudoephedrine* (one 60 mg tablet or two 30 mg tablets)
 - Your customer does not have to sign the logbook.
 - Your customer does not have to show identification.

* Note: does not apply to ephedrine or phenylpropanolamine

Who can see the logbook information?

- You must keep the logbook secure.
- You may share information in the logbook:
 - To comply with the law; and
 - For a product recall.
- Logbook information may only be shown to local, state and federal law enforcement.
- Information in the logbook may be copied, inspected only, or turned over entirely.
- Ask your supervisor for further information about sharing information.

How do I store these drug products?

- You must store drug products containing ephedrine, pseudoephedrine, and phenylpropanolamine either behind the counter or in a locked cabinet.
- You must give the drug product directly to the customer who signed the logbook.

How much of these drug products can I sell to each customer per day?

- You cannot sell more than 3.6 grams per day to each customer of Scheduled Listed Chemical Products containing ephedrine, pseudoephedrine or phenylpropanolamine.

How much of these drug products can my customer buy in a 30-day period?

- Your customer cannot buy more than 9 grams in a 30-day period of Scheduled Listed Chemical Products containing ephedrine, pseudoephedrine, or phenylpropanolamine.

Does not apply to products dispensed pursuant to a valid prescription

*Why Pseudoephedrine
or Ephedrine to Make
Methamphetamine?*

A Molecular Comparison

Pseudoephedrine

Methamphetamine

What's the big deal with Pseudoephedrine? The answer is basically **One Oxygen Molecule**. The molecular similarity of pseudo to meth is so close that using today's common methamphetamine manufacturing methods ("Shake & Bake" Red-Phosphorus or Anhydrous / Nazi method) simply reduce the molecular structure of pseudoephedrine/ ephedrine by one Oxygen molecule to create Methamphetamine.

Meth's Effects

Psychological Effects

- Delusions
- Extreme paranoia
- Hallucinations
- Increased alertness
- Sense of well-being
- Prolonged depression
- Excessive excitation and talking
- Panic
- Anxiousness and nervousness
- Moodiness and irritability

Cheri

Meth Addiction

- When compared to Alcohol and Cocaine:
 - A group of 100 people given a drink of alcohol every day for 3 weeks, 8 of the 100 will become addicted.
 - A group of 100 people given meth or cocaine orally or as snuff every day for 3 weeks, 14 of the 100 will become addicted.
 - A group of 100 people given meth by smoking or injection just 2 times, 90 of the 100 will become addicted.
 - If a recovering meth addict, who has been clean for 11 months, has a hit of meth in placed in front of them, the desire to use it will cause the addict to use it, 100% of the time.

◀ An individual suffering from "crank bugs", a condition sometimes seen in cases of heavy methamphetamine abuse. A similar condition, called "coke bugs" or "snow bugs", is also seen in heavy cocaine users. This is a drug induced hallucination or sensation that bugs are crawling on or under the skin. The abuser picks at the skin in an attempt to remove the bugs. The individual pictured had similar marks on his legs, face, chest and back.

Time To Gather

What is a Smurf?

A smurf is someone who buys small quantities of ingredients (e.g., PSE, ice packs, lithium, matches, iodine), from several different locations, in order to manufacture, or more likely, assist in the manufacture of methamphetamine.

Tracking vs Scheduling

Tracking

- Logbooks electronically connected to database
- Database determines if individual can make purchase
- Permanent electronic record of purchase
- Stop sale ability
- Helps LE identify smurfers
- Leads to identification of lab operators and labs
- More arrests and seizures....maybe
- Great tool for LE If all retail outlets are involved and the database is not corrupted by false IDs
- In Place - KY, MO*, AR*, CA*, ++++++

(Associated Press) “Analysis Finds Meth Flourishes Despite Tracking Laws”

“Electronic systems that track sales of the cold medicine used to make methamphetamine have failed to curb the drug trade and instead created a vast, highly lucrative market for profiteers to buy over-the-counter pills and sell them to meth producers at a huge markup.”

“The pharmaceutical industry has spent several million dollars to fund the tracking systems. For drug makers, that is far cheaper than one alternative -- making the medication available only by prescription. If more states do the same, it could be devastating for makers of cold and sinus pills. The pseudoephedrine market is estimated at more than \$550 million annually. “

Associated Press – January 11, 2011

Schedule III Prescription Only

- PSE and EPH can only be obtained pursuant to prescription from a physician or practitioner
- Cannot freely purchase from retail outlets - ends unrestricted availability and smurfing
- If a CS, PDMP may be utilized for tracking purposes (if authorized by state law or regulation)
- In place in Oregon – 96% lab seizure reduction
- In place in Mississippi – 67% reduction
- Decrease in labs leads to a decrease in resources expended – LE and local/city/state funds (OT, lab cleanups, environmental issues, children/defs/citizens/cops health care, foster care etc)
- LE can restructure resources to handle other LE issues instead of providing cleanup service and chasing smurfers
- Prevents labs – is not a reactive tool, but a preventative measure

Final Thoughts

35% of children removed from lab scenes test positive for meth
