

Combat Methamphetamine Epidemic Act

Diversion Investigator

George Lutz

802-951-2916

Goals and Objectives

- Discuss methamphetamine background and the scope of the problem as related to manufacture and abuse
- Identify and discuss the pharmacology of methamphetamine
- Discuss the Combat Methamphetamine Epidemic Elimination Act
- Discuss smurfing and diversion of Small Capacity Production Labs
- Discuss methamphetamine manufacture and the dangers associated with methamphetamine production

Questions to Discuss

- True or False....
 - The Combat Methamphetamine Epidemic Elimination Act was passed to limit the amount of ephedrine, pseudoephedrine, and/or Phenylpropanolamine available to clandestine laboratory operators who manufacture controlled substances such as methamphetamine and amphetamine.

True

Questions to Discuss

- Which of the following drugs are not covered under the Combat Methamphetamine Epidemic Elimination Act as Scheduled Listed Chemical Products?
 - A) Ephedrine
 - B) Pseudoephedrine
 - C) Phenylephrine
 - D) Phenylpropanolamine

C) Phenylephrine

- True or False....

- The easiest method of methamphetamine manufacture is through the “one-pot” method using pseudoephedrine or ephedrine.

True

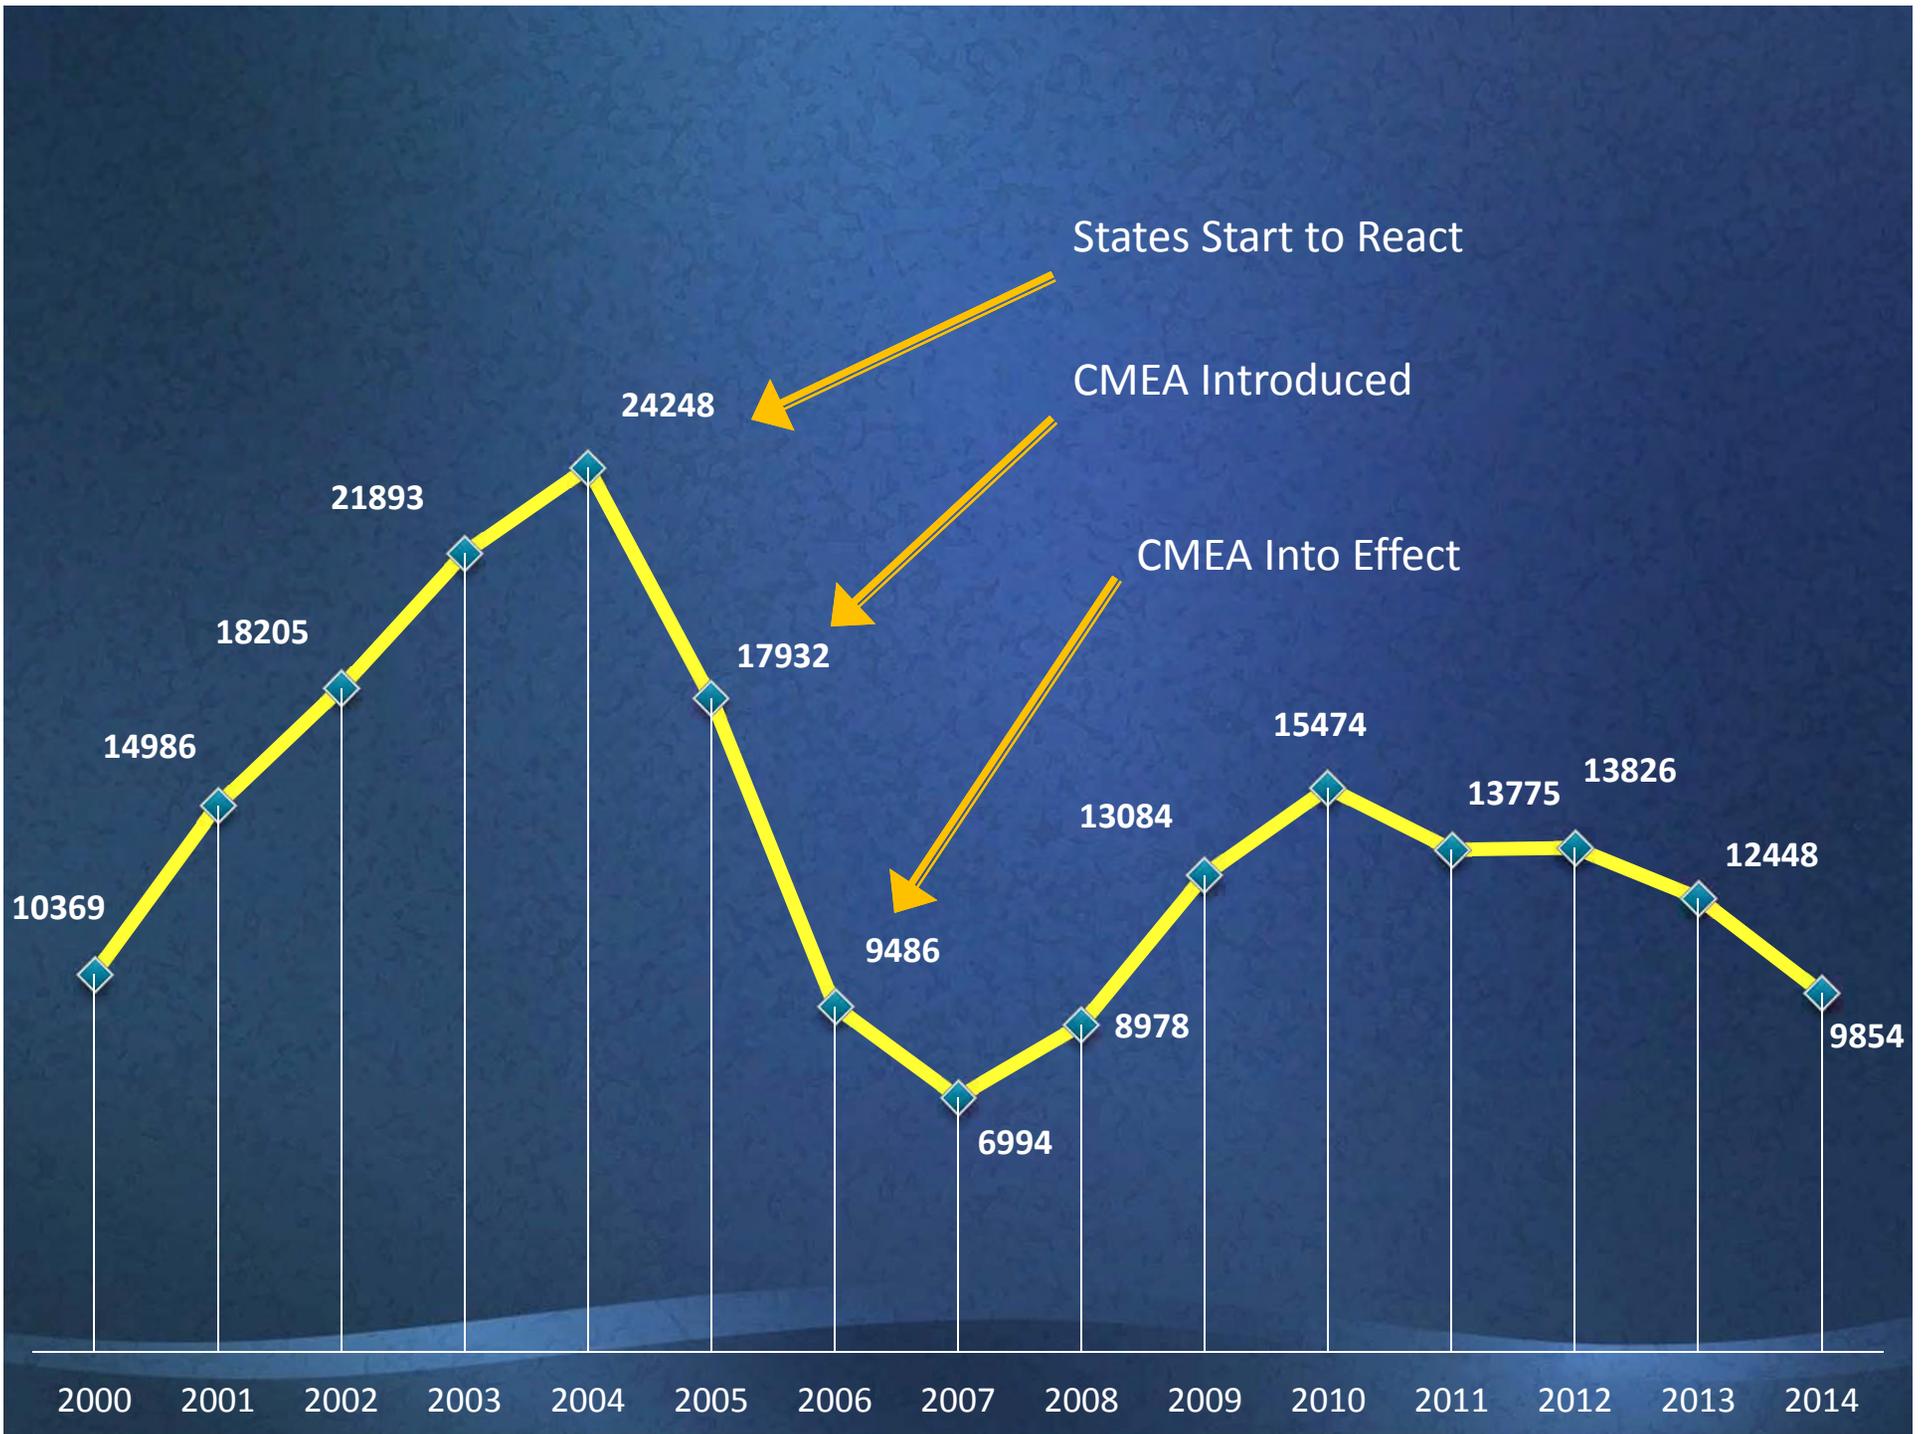

*Foreign vs. Domestic
Methamphetamine*

U.S. Methamphetamine Problem

- The U.S. methamphetamine threat is a two prong problem:
 - Methamphetamine manufactured by Mexican Trafficking Organizations (large “Super Labs” in Mexico & the U.S.)
 - Small Capacity Production Labs (SCPLs) (based in the U.S.)

EPIC SOUTHWEST BORDER METH STATS (CA, AZ, NM, TX)

YEAR	KILOGRAMS SEIZED
CY 2001	1,879.41 KG
CY 2002	1,217.69 KG
CY 2003	1,965.56 KG
CY 2004	2,436.97 KG
CY 2005	3,041.42 KG
CY 2006	2,875.07 KG
CY 2007	1,885.96 KG
CY 2008	2,236.74 KG
CY 2009	3,534.19 KG
CY 2010	5,513.76 KG
CY 2011	8,589.12 KG
CY 2012	12,541.87 KG
CY 2013	14,576.80 KG
CY 2014	16,139.68 KG
CY 2015	17,884.53 KG

Pennsylvania Meth Lab Incidents

PA Moves to nPlex
Real-time Electronic Tracking
(Jun 30, 2013)

Domestic Meth

- Today's Home-Grown Methamphetamine
 - Easier to make and more potent than ever before
 - Common chemicals purchased over the counter
 - Takes as little as one package of precursor
 - Today's meth made in as little as 15 minutes
 - earlier methods took 20+ hours
 - Today's labs are the most dangerous with regards to fires and explosions
 - Accounts for 98% of all reported clandestine labs

*Why do we have the
CMEA?*

To limit the domestic manufacture of methamphetamine by placing restrictions on the sale of Pseudoephedrine, ephedrine and phenylpropanolamine at retail outlets.

Domestic Chemical Trafficking

Sort by: **best**

↑ [-] **viscero** 3 points 1 year ago*

↓ Bronkaid is back in CVS, Walgreens, and Walmart stores in CA. ~\$15 for 60 tablets manufactured by Bayer.

Edit: Primatene is also around, but is twice as expensive since it has only half the ephedrine per dosage (check the box).

[permalink](#) [embed](#)

↑ [-] **[deleted]** 2 points 1 year ago

↓ Walmart near me in PA sells them too.

[permalink](#) [embed](#) [parent](#)

↑ [-] **juicenx** 1 point 1 year ago

↓ Yea, but you have to give an ID at the pharmacy. I wonder if they have a limit on how many you can buy per month or year.

[permalink](#) [embed](#) [parent](#)

↑ [-] **[deleted]** 2 points 1 year ago

↓ There is a limit but it's more than enough to run EC on your own.

If you're trying to buy it for yourself and 3 friends, it might throw up some flags.

[This PDF](#) shows that for 25 mg ephedrine sulfate (the kind found in Bronkaid), the purchase limit is 186 tablets per day (almost 8 boxes at 24 tablets per box), but not to exceed 18 boxes per month. Considering the max dosage is 50 mg per day according to [this resource](#), you should only need 185 pills for a 12 week dosage, which you can buy in 1 day apparently haha (if you could buy partial boxes).

Then again that PDF also puts the limit of no more than 2 packages in 1 transaction. So if you need what, 14 tablets per week, you can buy 2 boxes every 3 weeks and be good.

[permalink](#) [embed](#) [parent](#)

What information must be in the logbook?

- You must keep a logbook which contains a written or electronic list of sales of drug products containing ephedrine, pseudoephedrine, and phenylpropanolamine.
 - You must write or enter in the logbook the name of the drug product and the quantity sold.
 - Your customer must write or enter in the logbook their name and address, and the date and time of the sale.
 - Your customer must also sign the logbook (signature).

Identification and Verification

- Your customer must show you a photo identification issued by a State or the federal government.
- Alternate Forms of Identification are allowed by 8 CFR 274a.2(b)(1)(v)(A) and 274a.2(b)(1)(v)(B)

Identification and Verification

- You cannot sell Scheduled Listed Chemical Products containing ephedrine, pseudoephedrine, or phenylpropanolamine to customers unless they present appropriate identification.
- You must verify that your customer's name on the photo identification matches the name your customer wrote in the logbook.
- You must verify that the date and time of the sale that your customer wrote in the logbook are correct.

Who can see the logbook information?

- You must keep the logbook secure.
- You may share information in the logbook:
 - To comply with the law; and
 - For a product recall.
- Logbook information may only be shown to local, state and federal law enforcement.
- Information in the logbook may be copied, inspected only, or turned over entirely.
- Ask your supervisor for further information about sharing information.

How do I store these drug products?

- You must store drug products containing ephedrine, pseudoephedrine, and phenylpropanolamine either behind the counter or in a locked cabinet.
- You must give the drug product directly to the customer who signed the logbook.

How much of these drug products can I sell to each customer per day?

- You cannot sell more than 3.6 grams per day to each customer of Scheduled Listed Chemical Products containing ephedrine, pseudoephedrine or phenylpropanolamine.

How much of these drug products can my customer buy in a 30-day period?

- Your customer cannot buy more than 9 grams in a 30-day period of Scheduled Listed Chemical Products containing ephedrine, pseudoephedrine, or phenylpropanolamine.

Does not apply to products dispensed pursuant to a valid prescription

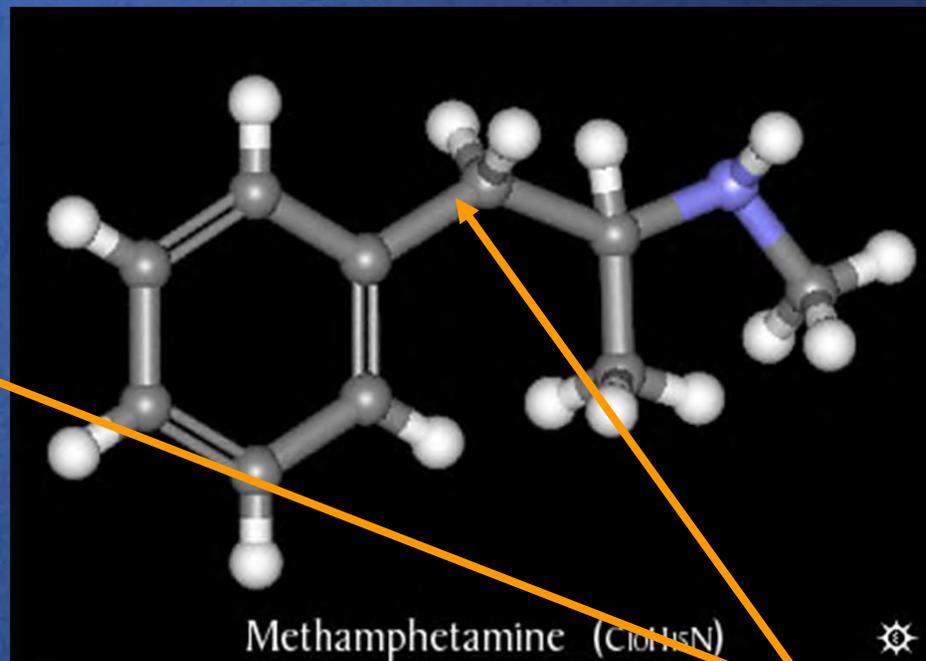

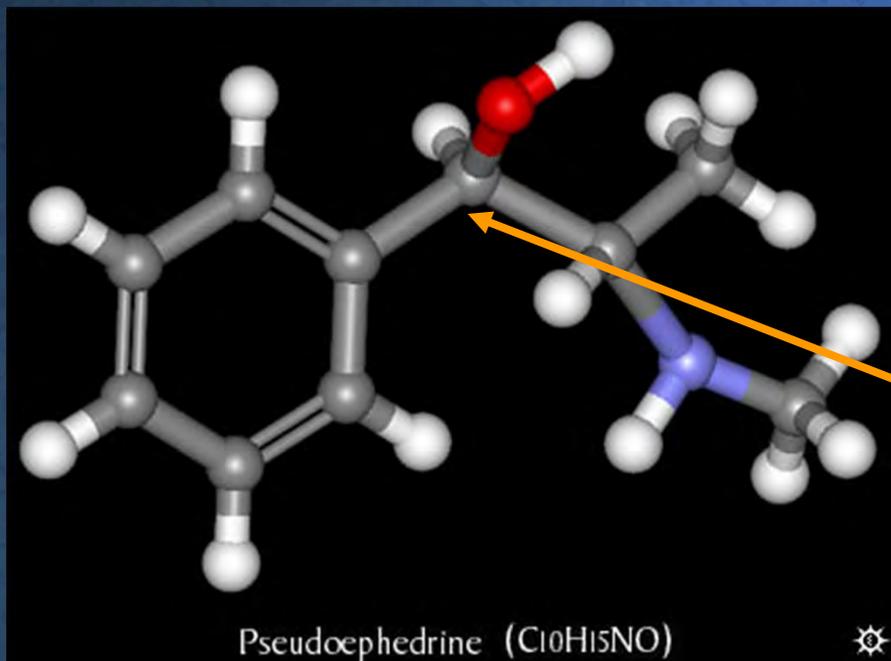

*Why Pseudoephedrine
or Ephedrine to Make
Methamphetamine?*

A Molecular Comparison

Pseudoephedrine

Methamphetamine

What's the big deal with Pseudoephedrine? The answer is basically **One Oxygen Molecule**. The molecular similarity of pseudo to meth is so close that using today's common methamphetamine manufacturing methods ("Shake & Bake" Red-Phosphorus or Anhydrous / Nazi method) simply reduce the molecular structure of pseudoephedrine/ ephedrine by one Oxygen molecule to create Methamphetamine.

Meth's Effects

Psychological Effects

- Delusions
- Extreme paranoia
- Hallucinations
- Increased alertness
- Sense of well-being
- Prolonged depression
- Excessive excitation and talking
- Panic
- Anxiousness and nervousness
- Moodiness and irritability

Cheri

Meth Addiction

- When compared to Alcohol and Cocaine:
 - A group of 100 people given a drink of alcohol every day for 3 weeks, 8 of the 100 will become addicted.
 - A group of 100 people given meth or cocaine orally or as snuff every day for 3 weeks, 14 of the 100 will become addicted.
 - A group of 100 people given meth by smoking or injection just 2 times, 90 of the 100 will become addicted.
 - If a recovering meth addict, who has been clean for 11 months, has a hit of meth in placed in front of them, the desire to use it will cause the addict to use it, 100% of the time.

◀ An individual suffering from "crank bugs", a condition sometimes seen in cases of heavy methamphetamine abuse. A similar condition, called "coke bugs" or "snow bugs", is also seen in heavy cocaine users. This is a drug induced hallucination or sensation that bugs are crawling on or under the skin. The abuser picks at the skin in an attempt to remove the bugs. The individual pictured had similar marks on his legs, face, chest and back.

Time To Gather

What is a Smurf?

A smurf is someone who buys small quantities of ingredients (e.g., PSE, ice packs, lithium, matches, iodine), from several different locations, in order to manufacture, or more likely, assist in the manufacture of methamphetamine.

Final Thoughts
