

MISSISSIPPI

WHAT IS THE PRESCRIPTION MONITORING PROGRAM?

The Mississippi Prescription Monitoring Program (MS PMP) is an electronic tracking program managed by the Mississippi Board of Pharmacy to aid practitioners and dispensers in providing proper pharmaceutical care relating to controlled substances. It also serves as a tool for regulatory agencies and authorized law enforcement to identify potential inappropriate use of controlled substance prescription medication. The MS PMP is an online service available 24/7 that provides a patient's controlled substance drug profile as well as prescriber and dispenser information.

- §73-21-103 OF THE PHARMACY PRACTICE ACT PROVIDES THE PENALTY FOR MISUSE AS \$50,000 FINE PER VIOLATION. ALSO, \$10,000 FINE FOR NON REPORTING FOR EACH REPORTING PERIOD (CURRENTLY EVERY 24 HOURS).

- §73-21-127 OF THE PHARMACY PRACTICE ACT AUTHORIZES THE PRESCRIPTION MONITORING PROGRAM AND ITS USE.

PMP - Inside Information

- **Mississippi began collecting information in April of 2005. Web based system and mandatory reporting – 2008**
- **49 States have active PMPs. Missouri does not.**

PMPi

Prescription Monitoring Program Interconnect Interface

- **PMPi is the Interconnect between participating states. Not all states are on board. We currently share with 11 states - AR, TN, ND, AZ, IL, KS, MN, NM, MI, ID, LA.**
- **Understand that the PMP and the PMPi is a tool. Information is not always 100% accurate. It is comprised of information reported by dispensers. Mistakes do occur.**
- **Names are similar and right now, name and DOB are the requirements for PMPi.**

- In 2006 – Mississippi had 1,278 System Queries
- In 2007 – Mississippi had 2,377 System Queries
- 2015 - Queries now are approximately **3,000 Per Day or 70,000 Per Month**
- There was an 18% increase in web queries over the past year (2014)
- There was a 36% increase in web and PMPi queries over the past year (2014)

PMP system queries and usage

- **Approximately 600,000 prescriptions per month are submitted to the clearinghouse**
- **There are currently 5,876 MDs, 1,961 NPs, and 2,540 RPHs registered.**
- **There are 113 Physician Assistants registered.**
- **Through June 2015, there have been approximately 1,065,000 patient queries by prescribers and 400,000 patient queries by pharmacists.**

WHAT ARE THE RULES?

- I affirm that all information in my online data requesters registration is true and that all requests made pursuant to approval of this registration will be used for legitimate purposes. All data obtained from the site should be treated as Protected Health Information and handled in accordance with all federal and state laws regarding such. HIPAA and other privacy laws affect the disclosure of any data that is obtained. Additionally, **I understand that inappropriate access or disclosure of patient profile information received from the MS PMP database is a violation of state law, and may result in disciplinary action by my licensing board, criminal charges and /or revocation of my database access privileges. I agree I will not share my login information with anyone.** I understand the information in the MS PMP database may contain errors resulting from the reporting of information received. The MS PMP staff suggests that additional independent verification of patient profile information with pharmacies and prescribers may sometimes be prudent or necessary. I understand that in some cases two prescriptions attributed to a patient for a single day may be the result of an unresolved insurance claim at the pharmacy level. I understand it is a violation of HIPAA and patient's right to privacy to discuss the contents of a report with individuals who are not directly involved in providing treatment to the subject.
