DEA Trends & Update

North Dakota Pharmacy Diversion Awareness Conference

October 2, 2016
I have no relevant personal/professional/financial relationship(s) to disclose
Goals and Objectives

- Public Health Epidemic
- Impact on Society
- Drugs of Abuse
- Criminal Activity
- The Controlled Substances Act: Checks & Balances
- Legal obligations: DEA registrant
- The DEA Response
- Disposal
- Miscellaneous Pharmacy Topics
Public Health Epidemic
COPS: PHOTOS OF BOY WITH PASSED-OUT ADULTS SHOW DRUG SCOURGE

Police in East Liverpool, Ohio released these images they say to illustrate the impact of the heroin and painkiller epidemic. (City of East Liverpool, Ohio/Facebook)
Primum non nocere
On an average Day in the U.S.:

- More than **650,000 opioid prescriptions dispensed**
- **3,900 people** initiate nonmedical use of prescription opioids
- **580 people** initiate heroin use

---

Public Health Epidemic

2000-2014:
Unintentional drug overdose deaths in the US increased 137%, which was a 200% increase in overdose deaths involving opioids.

500,000 deaths due to prescription overdose

2014:
Over 47,000 drug-related overdose deaths

129 deaths every 24 hours
46 deaths by end of today’s PDAC
1 death every 11.16 minutes

28,647 deaths involved opioids, including heroin (78)

19,000 deaths involved prescription opioid (52)

CDC National Center for Health Statistics/Morbidity and Morality Weekly Report (MMWR); January 1, 2016
U.S. Drug Enforcement Administration
Office of Diversion Control
2014 Comparison

Drug Overdose & Motor Vehicle Accident Deaths

Data: CDC
At least HALF of all opioid overdose deaths involve a prescription opioid.

Drug overdose death rates, United States, 2014

Drug overdose deaths per 100,000 population

- 6.3 - 11.7
- 11.9 - 14.4
- 15.1 - 18.4
- 19 - 35.5

*Age-adjusted death rate per 100,000 population

Patients Often Prescribed Extra Painkillers, Many Share Them

Two new U.S. studies shed light on opioid epidemic

**John Hopkins Study:**

+60% had leftover opioids they hung on for “future use”
  20% shared their medications
  8% likely will share with friend
  14% likely will share with relative
-10% securely lock their medication

**Harvard Study:**

600,000 Medicare recipients found that 15% of hospital patients got a new opioid prescription at discharge. Of those patients, almost 43% were still taking opioids more than 3 months later.

Countless Opioid Pills Unused by Dental-Surgery Patients

TUESDAY, Sept. 27, 2016 (HealthDay News) -- More than half of the narcotic painkillers prescribed after wisdom teeth removal go unused, according to a new study that suggests this could contribute to the U.S. opioid epidemic.

"When translated to the broad U.S. population, our findings suggest that more than 100 million opioid pills prescribed to patients following surgical removal of impacted wisdom teeth are not used, leaving the door open for possible abuse or misuse by patients, or their friends or family," said study author Dr. Brandon Maughan.

Violence
Starting the year with a bang

Saranac Hale Spencer, The News Journal  12:36 a.m. EST January 4, 2016

A 26-year-old Lewes man threatened to detonate explosives he said were strapped to his body if a pharmacist at a Walgreens near Magnolia didn't give him prescription drugs, according to state police.

The man, Curtis Kuhn, didn't actually have explosives strapped to his body, according to police.

Kuhn went into the pharmacy at about 9:30 a.m. on Saturday and put a note on the counter demanding Percocet and Xanax – he told the pharmacist that he had explosives strapped to his body and he was being forced to commit the robbery by someone who was sitting in a car in the parking lot, according to police.

When officers arrived shortly after that, they took Kuhn into custody without incident and found that he had no explosives and there was no car fitting his description in the parking lot, according to police.

Kuhn was charged with first-degree attempted robbery, attempted theft of a controlled substance and two counts of terroristic threatening. He was arraigned and sent to Vaughn Correctional Center near Smyrna for lack of $27,000 secured bond and

PAIN KILLER

David Laffer is the man caught on video wearing a fake beard (left) who slaughtered four people in a pharmacy to feed his wife Melinda's addiction, cops said yesterday.

PAGES 4-5
Drugs of Abuse
Most commonly prescribed prescription medicine?

Hydrocodone/acetaminophen
Hydrocodone

- Hydrocodone / Acetaminophen (toxicity)

- Similarities:
  - Structurally related to codeine
  - Equal to morphine in producing opiate-like effects

- Brand Names: Vicodin®, Lortab®, Lorcet®

- October 6, 2014 moved to SCHEDULE II

- “Cocktail” or “Trinity”
  - Hydrocodone
  - Soma® / carisoprodol
  - Alprazolam / Xanax®

Street prices: $2 to $10+ per tablet depending on strength & region

U.S. Drug Enforcement Administration
Office of Diversion Control
The Trinity

Hydrocodone

Opiate

Carisoprodol

Muscle Relaxant

C-IV as of 1/11/2012

Alprazolam

Benzodiazepine

U.S. Drug Enforcement Administration
Office of Diversion Control
Oxycodone

- OxyContin controlled release formulation of Schedule II oxycodone
  - The controlled release method of delivery allowed for a longer duration of drug action so it contained much larger doses of oxycodone
  - Abusers easily compromised the controlled release formulation by crushing the tablets for a powerful morphine-like high
  - 10, 15, 20, 30, 40, 60, 80mg available

- Effects:
  - Similar to morphine in effects and potential for abuse/dependence
  - Sold in “Cocktails” or the “Holy Trinity”
    - Oxycodone, Soma ® / Xanax®

- Street price: Approx. $80 per 80mg tablet

NOTE: New formulation introduced into the marketplace in 2010 that is more difficult to circumvent for insufflation (snorting) or injection. Does nothing to prevent oral abuse.
Oxycodone HCL CR (OxyContin®) Reformulation
New OxyContin® OP

well just got ours and they suck! when snorted the pill balls up in your nose and gets stuck, so i tried sucking on one and it did ok, but tastes nasty. No way you can shoot them as mentioned in a previous post. havent tried smoking it yet, kinda in a hole money wise, it cost me over $700.00 to get my 80s filled and i probably wont even get half my money back 😞

* if anyone has tried to smoke this new formulated shit, please post! thanks

ya my friend has tried to smoke the new ones... said its very harsh on the lungs and throat...

so far the only way ive been able to beat the time release, is use a hose clamp to grind it very fine, and snort it.. it doesnt gel up like you would think (doesnt gel up like the football shaped generic 40's do anyways) it just kinda turns snotty.. but if you can get it down fast it seems to work ok

Opiates and Heroin

- 4 out of 5 recent heroin initiates used prescription opioids non-medically.\(^1\)

- The recent heroin abuse rate is 19 times higher among those who reported prior non-medical use of pain relievers than among those who did not report such use.\(^2\)

- Overdose deaths from heroin abuse have more than doubled since 2010.\(^3\)

Heroin use spikes in area suburbs
Pill addicts risk deadly drug
Community Impact?

Heroin trafficking organizations relocating to areas where prescription drug abuse is on the rise

Heroin traffickers pave the way for increasing crime and violence

Law enforcement and prosecutors eventually fighting the problem on two fronts (prescription opiate diversion and heroin distribution) further depleting resources

Communities suffer
Criminal Activity
Egregious Activity
(Not on the fringes)
United States V. Alvin Yee, M.D.

Dr. Alvin Yee

U.S. Drug Enforcement Administration
Office of Diversion Control
United States V. Alvin Yee, M.D.

MEDICAL OFFICE
Various Locations, Orange County, California
Dr. Yee primarily met with his “patients” in Starbucks cafes throughout Orange County, California.

He would see up to a dozen patients each night between 7:00 and 11:00 p.m. and wrote these “patients” prescriptions, primarily for opiates, in exchange for cash.

Yee pled guilty to distributing millions of dollars in oxycodone, oxymorphone, hydrocodone, hydromorphone, Adderall® and alprazolam outside the course of professional practice and without a legitimate medical purpose.
CURES Data (PMP)

During a one-year time period, Yee wrote prescriptions for a total of 876,222 dosage units of all medications combined.

52% of all prescriptions (458,056 dosage units) written by Yee were for oxycodone (92%-30mg) during the one-year period.

96% - oxycodone, hydrocodone, alprazolam, hydromorphone, and oxymorphone.

Almost half of Yee’s patients were 25 and under.
The Controlled Substances Act: Checks & Balances
The mission of the Office of Diversion Control is to **prevent**, **detect**, and **investigate** the diversion of pharmaceutical controlled substances and listed chemicals from legitimate channels of distribution

*while* ...

ensuring an adequate and uninterrupted supply of controlled substances to meet **legitimate medical**, **commercial**, and **scientific needs**.
Closed System of Distribution

1,659,374 (09/09/2016)

- Practitioners: 1,248,136
- Mid Level Practitioner: 306,552
- Retail Pharmacies: 72,106
- Hospital/Clinics: 17,524
Closed System of Distribution

Cyclic Investigations

Established Schedules

Record Keeping Requirements

Registration

Security Requirements

Established Quotas

ARCOS
Drug Enforcement Administration
Office of Diversion Control
Closed System of Distribution

The DEA is responsible for:

- the **oversight** of the system
- the **integrity** of the system
- the **protection** of the public health and safety
Legal Obligations: DEA Registrant
Effective Controls

- All applicants and registrants shall provide effective controls and procedures to guard against theft and diversion of controlled substances.

- In order to determine whether a registrant has provided effective controls against diversion, the Administrator shall use the security requirements set forth in §§ 1301.72-1301.76 as standards for the physical security controls and operating procedures necessary to prevent diversion.

21 CFR § 1301.71(a)
Non-practitioners of controlled substances

“The registrant shall design and operate a system to disclose to the registrant suspicious orders of controlled substances...Suspicious orders include orders of unusual size, orders deviating substantially from a normal pattern, and orders of unusual frequency.”

21 CFR § 1301.74(b)
Prescriptions

A prescription for a controlled substance to be effective must be issued for a legitimate medical purpose by an individual practitioner acting in the usual course of professional practice.

21 CFR § 1306.04(a)

United States v Moore 423 US 122 (1975)
CDC Guidelines for Prescribing Opioids for Chronic Pain

- Clinical Reminders:
  - Opioids are not first-line or routine therapy for chronic pain
  - Establish and measure goals for pain and function
  - Discuss benefits and risks and availability of nonopioid therapies with patient

CDC Guidelines for Prescribing Opioids for Chronic Pain

- Use immediate-release opioids when starting
- Start low and go slow
- When opioids are needed for acute pain, prescribe no more than needed
- Do not prescribe ER/LA opioids for acute pain
- Follow-up and re-evaluate risk of harm; reduce dose or taper and discontinue if needed

CDC Guidelines for Prescribing Opioids for Chronic Pain

- Evaluate risk factors for opioid-related harms
- Check PDMP for higher dosages and prescriptions from other providers
- Use urine drug testing to identify prescribed substances and undisclosed use
- Avoid concurrent benzodiazepine and opioid prescribing
- Arrange treatment for opioid use disorder if needed

The responsibility for the proper prescribing and dispensing of controlled substances is upon the prescribing practitioner, but a corresponding responsibility rests with the pharmacist who fills the prescription.

21 CFR § 1306.04(a)
Corresponding Responsibility by Pharmacist

- A pharmacist, by law, has a corresponding responsibility to ensure that prescriptions are legitimate.
- When a prescription is presented by a patient or demanded to be filled for a patient by a doctor’s office, a pharmacist is not obligated to fill the prescription!!!
The Last Line of Defense
Potential Red Flags

Many customers receiving the same combination of prescriptions; cocktail

Many customers receiving the same strength of controlled substances; no individualized dosing: multiple prescriptions for the strongest dose

Many customers paying cash for their prescriptions

Early refills

Many customers with the same diagnosis codes written on their prescriptions;

Individuals driving long distances to visit physicians and/or to fill prescriptions;
Potential Red Flags continued

Customers coming into the pharmacy in groups, each with the same prescriptions issued by the same physician; and

Customers with prescriptions for controlled substances written by physicians not associated with pain management (i.e., pediatricians, gynecologists, ophthalmologists, etc.).

Overwhelming proportion of prescriptions filled by pharmacy are controlled substances

Pharmacist did not reach out to other pharmacists to determine why they were not filling a particular doctor’s prescription

Verification of legitimacy not satisfied by a call to the doctors office
Red Flag?

What happens next?

You attempt to resolve...
Resolution is comprised of many factors

- Verification of a valid practitioner DEA number! It is not, however, the end of the pharmacist’s duty. Invalid DEA number = Invalid RX
- Resolution cannot be based solely on patient ID and prescriber verification.
- You must use your professional judgment, training and experience...we all make mistakes
- Knowledge and history with the patient
- Circumstances of prescription presentation
- Experience with the prescribing practitioner
- It does not require a call to the practitioner for every CS RX
- This is not an all-inclusive list...
Who do I call to report a practitioner?

- State Board of Pharmacy, Medicine, Nursing, Dental
- State, County, Local Police
- DEA local office and Tactical Diversion Squad
- Health Department
- HHS OIG if Medicare, Medicaid fraud
The DEA Response
360 Degree Strategy
DEA recognizes we cannot arrest our way out of the drug problem – our goal is lasting success in the communities we serve.

Education and Prevention are key elements for a true 360 Strategy.

Law enforcement operations provide an opportunity for community empowerment and a jumping off point for education and prevention efforts.
DEA Registrant Initiatives

Distributor Initiative

Educate and inform distributors/manufacturers of their due diligence responsibilities under the CSA by discussing their Suspicious Order Monitoring System, reviewing their ARCOS data for sales and purchases of Schedules II and III controlled substances, and discussing national trends involving the abuse of prescription controlled substances.

Briefings to 99 firms with 309 registrations
This conference is designed to educate pharmacists, pharmacy technicians, and pharmacy loss prevention personnel on ways to address and respond to potential diversion activity.

## FY-2017 PDACs

- **39 Fargo, North Dakota** - October 2, 2016
- **40 Arlington, Virginia** - November 19 & 20, 2016*
- **41 Buffalo, New York** - December 9 & 10, 2016*
- **42 Waikiki, Honolulu** - January 22 & 23, 2017
- **43 Alaska** - February 2017 (Date TBD)
- **44 Kansas** - March 2017 (Date TBD)
- **45 Connecticut/Rhode Island** - April/May 2017 (Date TBD)

**36 STATES**

**77 PDAC CONFERENCES**

*Repeated State
DEA Registrant Initiatives

- The Federation of State Medical Boards (FSMB) promotes excellence in medical practice, licensure, and regulation on behalf of 70 state medical and osteopathic Boards across the country in their protection of the public.

- DEA and FSMB are currently working on developing strategies to work more effectively and jointly on indiscriminate prescriber investigations in order to facilitate the administrative process to take action against those that are a threat to the public health and welfare quickly, and at the same time not jeopardize a criminal investigation.
“Stakeholders’ Challenges and Red Flag Warning Signs Related to Prescribing and Dispensing Controlled Substances”

- Represents the medical, pharmacist, and supply chain spectrum highlighting the challenges and “red flag” warning signs related to prescribing and dispensing controlled substance prescriptions.

- The goal was to provide health care practitioners with an understanding of their shared responsibility to ensure that all controlled substances are prescribed and dispensed for a legitimate medical purpose, as well as to provide guidance on which red flag warning signs warrant further scrutiny.

- NABP along with 10 national associations and 6 major pharmaceutical firms were the coalition of stakeholders of this document.
Scheduled Investigations

- Increase in the number of DEA registrants that are required to be investigated to ensure compliance with the Controlled Substances Act and its implementing regulations

- Increase in the frequency of the regulatory investigations

- Verification investigations of customers and suppliers
Since 2011, Eleven States have Passed Legislation Mandating Prescriber Education
Maine

- Second State to Mandate Electronic Prescribing
- Prescribers are required to undergo addiction training every 2 years
- Set cap on daily strength for opioid prescribing:
  - Acute pain – 7 days
  - Chronic pain – 30 days
- To begin January 2017
Got Drugs?

Turn in your unused or expired medication for safe disposal. Saturday, Sept. 25th.

Total Weight Collected (pounds): 893,498  (447 Tons)

Drug Enforcement Administration Diversion Control Program
Secure and Responsible Drug Disposal Act of 2010

U.S. Drug Enforcement Administration
Office of Diversion Control
Ultimate User

**Ultimate user** means as “a person who has lawfully obtained, and who possesses, a controlled substance for his own use or for the use of a member of his household or for an animal owned by him or a member of his household.”

21 USC § 802(27)

**Ultimate user** methods of destruction prior to Disposal rule:

- Disposal in Trash (ONDCP method); or
- Flushing (FDA opioids and select CSs)
- National Take-back Event (DEA)
- Transfer to Law Enforcement
- (Police Station Receptacles or local Take-back events)
- DEA
Secure and Responsible Drug Disposal Act of 2010

- CSA amended to provide ultimate users and LTCF with additional methods to dispose of unused, unwanted or expired controlled substance medication in a secure, safe and responsible manner
  21 USC § 822(f) & (g)

- Participation is voluntary
  21 USC § 822(g)(2)

- Registrants authorized to collect:
  - Manufacturers
  - Distributors
  - Reverse Distributors
  - Narcotic Treatment Programs
  - Hospitals/clinics with an on-site pharmacy
  - Retail Pharmacies
  21 CFR § 1317.40

Authorized collectors, as registrants, are readily familiar with the security procedures and other requirements to handle controlled substances.
Law Enforcement

- Law Enforcement may continue to conduct take-back events.
- Any person may partner with Law Enforcement.
- Law Enforcement shall maintain control and custody of collected substances until secure transfer, storage, or destruction has occurred.
- Authorized collection receptacles and inner liners “should” be used.

21 CFR § 1317.35 and 1317.65
Collection
**Collection** means to receive a controlled substance for the purpose of destruction from an:

- Ultimate user,
- Person lawfully entitled to dispose of an ultimate user decedent’s property, or
- LTCF on behalf of an ultimate user who resides or has resided at the facility.

21 USC § 822(g)(3) & (4) and 21 CFR § 1300.01(b)
Design of Collection Receptacles

- Securely fastened to a permanent structure.
- Securely locked, substantially constructed container with permanent outer container and removable inner liner.
- Outer container must have small opening that allows for contents to be added, but does not allow for removal of contents.
- Outer container must display a sign stating only Schedule II-V and non-controlled substances are acceptable substances.
- Schedule I controlled substances are not permitted to be collected.

21 CFR § 1317.75(e)
Collection Receptacles

- Ultimate users shall put the substances directly into the collection receptacle.
- Controlled and non-controlled substances may be comingled.
- Collected substances shall not be counted, sorted, inventoried, or otherwise individually handled.
- Registrants shall not dispose of stock or inventory in collection receptacles.

21 CFR § 1317.75(b) and (c)
Collection Receptacle Location

- Registered location – immediate proximity of designated area where controlled substances are stored and at which an employee is present.
  - LTCF – located in secure area regularly monitored by LTCF employees.
  - Hospital/clinic – located in an area regularly monitored by employees—not in proximity of where emergency or urgent care is provided.
  - NTP – located in a room that does not contain any other controlled substances and is securely locked with controlled access.

21 CFR § 1317.75(d)
Mail-Back Program

Requirements of mail-back program

- Only lawfully possessed schedules II-V controlled substances may be collected

- Controlled and non-controlled substances may be collected together

- **Must have method of on-site destruction**
  
  21 CFR § 1317.70 (b)

DEA Registrant who sells mail-back packages for another registrant is **NOT** required to modify registration as a collector
Registrant Disposal
Registrant Disposal - Inventory

Practitioner & Non-Practitioner may dispose of inventory

- Prompt on-site destruction
- Prompt delivery to reverse distributor by common or contract carrier or reverse distributor pick-up
- Return and recall: Prompt delivery by common or contract carrier or pick-up at the registered location

Practitioner may also request assistance from the SAC
Non-Practitioner may also transport by its own means

21 CFR § 1317.05(a) and (b)
Form 41 shall be used to record the destruction of all controlled substances, including controlled substances acquired from collectors.

- The Form 41 shall include the names and signatures of the two employees who witnessed the destruction.
- Exceptions for DEA Form 41:
  - Destruction of a controlled substance dispensed by a practitioner for immediate administration at the practitioner’s registered location, when the substance is not fully exhausted (i.e. wastage) shall be properly recorded in accordance with § 1304.22(c), and such record need not be maintained on a Form 41
  - Transfers by registrant to a reverse distributor must be recorded in accordance with § 1304.22(c), and such record need not be maintained on a Form 41
Abandoned Controlled Substances

• Circumstances when there is no authorized person to dispose of controlled substances
  ➢ School
  ➢ Summer camp
  ➢ Hospital

• Return to ultimate user is not feasible

• Options
  ➢ Contact law enforcement or DEA
  ➢ Destroy on-site

79 FR 53546 (Disposal Final Rule)
Pharmaceutical Wastage
Pharmaceutical Wastage

**Not** subject to **21 CFR Part 1317**
- Destruction does not have to be “non-retrievable”
- DEA Form 41 must not be utilized

- Dispensing must be recorded as a record
  21 CFR § 1304.22(c)

- Clarification memorandum on DEA website at [www.deaDiversion.usdoj.gov](http://www.deaDiversion.usdoj.gov)
Miscellaneous Pharmacy Topics
Changes to a Schedule II Prescription

Pharmacist may change:

- Patient's address upon verification
- Dosage form, drug strength, drug quantity, directions for use, or issue date only after consultation with and agreement of the prescribing practitioner.
  - Consultation should be noted on the prescription
  - Must be in compliance with state law/regulation/policy

Pharmacy may not make changes:

- Patient's name
- Controlled substance prescribed (except for generic substitution permitted by state law), or
- Prescriber's signature
Multiple Prescriptions
Schedule II Controlled Substances

- Individual practitioner may issue multiple prescriptions which authorizes patient to receive 90-day supply of C-II
  - Each separate prescription is for legitimate medical purpose issued by practitioner acting in usual course of professional practice
  - Written instructions on each prescription indicating earliest date it can be filled
  - Doesn’t cause undue risk of diversion by patient
  - Compliance with all other elements of CSA and state laws

21 CFR § 1306.12(b)
Faxed Prescription vs. EPCS

• True electronic prescriptions are transmitted as **electronic data files** to the pharmacy, whose application imports the data file into its database.

• A system that allows the prescriber to “sign” his/her name does **NOT** conform to EPCS regulations.

• A facsimile with a written signature is **NOT** an electronic Rx.

21 CFR § 1306.05(d)
Schedule II narcotic substances may be transmitted by the practitioner or the practitioner's agent to the dispensing pharmacy by facsimile

- Practitioner (or agent) must note it is hospice patient
- Facsimile serves as original written prescription

21 CFR § 1306.11(f), (g) & 1306.13(b)

Schedule III-V prescription

- Written prescription signed by a practitioner, or
- Facsimile of a written, signed prescription transmitted by the practitioner (or agent) to the pharmacy, or
- Oral prescription made by an individual practitioner and promptly reduced to writing by the pharmacist
Distribution by Pharmacy to Practitioner

- Practitioner registered to dispense may distribute a quantity of such substance to another practitioner for general dispensing
  - Purchaser must be registered with DEA
  - Schedule III-V - records by purchaser and receiver must conform to 21 CFR § 1304.22(c)
  - Schedule I or II - an order form must be used and must conform to 21 CFR § 1305
  - Total number of controlled substances dispensed cannot exceed 5% of total controlled substances dispensed

21 CFR § 1307.11(a)(1)
Repackaging by Pharmacy

- Practitioner can prepare, compound, package, or label in the course of his professional practice. 
  21 CFR § 1300.01(b)

- Pharmacy can **NOT** repackage drugs (i.e., 100 ct bottle packaged in smaller size bottles) and sell the drugs in the form of a distribution to any DEA Registrant – including practitioner office.

- Violation of DEA and FDA regulations
