The following presentation does not purport to establish legal standards that are not contained in statutes, regulations, or other competent law.

Statements contained in this presentation that are not embodied in the law are not binding on DEA. Summaries of statutory and regulatory provisions that are summarized in this presentation do not purport to state the full extent of the statutory and regulatory requirements of the cited statutes and regulations. I have no financial relationships to disclose.
This presentation is for educational purposes only. This presentation may not be further copied or used, with the embedded images and videos, without an independent analysis of the application of the Fair Use doctrine.

**Fair Use**

Under section 107 of the Copyright Act of 1976, allowance is made for “Fair Use” for purposes such as criticism, comment, news reporting, teaching, scholarship, education and research.

Fair Use is a use permitted by the copyright statute that might otherwise be infringing. Any potentially copyrighted material used in this presentation has been reviewed and found to be used in a manner consistent with Fair Use. A completed Fair Use checklist is attached.
Course Objectives

To introduce and provide practitioners with information:

- Related to key state and federal resources involving controlled substances.
- On how to assist patients and their family members with overcoming controlled substance addiction.
- Concerning resources specific to their communities.
- On related resources to the prescribing and dispensing of controlled substances.
At the completion of this block of instruction you will be able to answer the following questions:

- Which website can you access in order to obtain information about DEA laws and regulations?
- Does the DEA provide a guidance manual for practitioners on the DEA website?
Questions to Discuss

- Which website provides a list of treatment centers for individuals seeking addiction treatment?
- Which websites would you go to in order to locate a controlled substance collection site?
- Who can submit a tip to the DEA online?

Opioid Prescribing

Where you live matters

Overview

The amount of opioids prescribed in the US peaked in 2010 and then decreased each year through 2015. However, prescribing remains high and varies widely from county to county. Healthcare providers begin using opioids in the late 1990s to treat chronic pain (not related to cancer), such as arthritis and back pain. As this continued, more opioid prescriptions were written, for more days per prescription, in higher doses. Taking opioids for longer periods of time or in higher doses increase the risk of addiction, overdose, and death. In 2015, six times more opioids per resident were dispensed in the highest prescribing counties than in the lowest prescribing counties. County-level characteristics, such as rural versus urban, income levels, and demographics, only explained about a third of the differences. This suggests that people receive different care depending on where they live.

Healthcare providers can:

- Follow the CDC Guidelines for Prescribing Opioids for Chronic Pain, which includes recommendations such as:
  - Use opioids only when benefits are likely to outweigh risks.
  - Start with the lowest effective dose of immediate-release opioids.
  - For acute pain, prescribe only the number of days that the pain is expected to be severe enough to require opioids.
  - Reassess benefits and risks if considering dose increases.
  - Use state-based prescription drug monitoring programs (PDMPs) which help identify patients at risk of addiction or overdose.

Now available

- MMWR Viewpoint
- Free Continuing Education (CE) on Opioid Prescribing (MMH/2016 revelence)
The goals of the CDC RX Awareness site are to:

- Increase awareness of the dangers of opioid addiction.
- Decrease the number of individuals who abuse opioids.
- Highlights real stories of drug addiction.

Resources for the Community
The DEA has joined forces with Discovery Education to create a comprehensive and innovative program to combat opioid misuse through integration in the classroom.
The Operation Prevention site provides:

- Virtual classrooms
- Virtual field trips
- Parent tool kit
- Video challenges
- Student learning modules
Community Resources

Teachers – Operation Prevention
www.operationprevention.com

About the Program

The DEA and Discovery Education have joined forces to combat a growing epidemic of prescription opioid misuse and heroin use nationwide. Operation Prevention’s mission is to educate students about the true impacts of opioids and kick-start lifesaving conversations in the home and classroom.

Since its launch, Operation Prevention has reached over 4M students nationwide. No local sponsorship or corporate funding is necessary for you to get started today.

DEA and Discovery Education are grateful to the National Institute on Drug Abuse (NIDA) and the Substance and Abuse and Mental Health Services Administration’s (SAMHSA) Center for Substance Abuse Prevention for their contributions to the development of Operation Prevention.

Community Resources

Teachers – Operation Prevention

www.operationprevention.com
Operation Prevention's classroom resources provide educators with engaging tools that are aligned to national health and science standards and integrate seamlessly into classroom instruction. Through a series of hands-on investigations, these resources introduce students to the science behind opioids and their impact on the brain and body.
Elementary School

Proactive Prevention
Over-the-Counter and Prescription Medications: How do medications work in our bodies, and why is it so important to use them responsibly? Follow medication on a path through the body to investigate how they make us feel better with responsible use.

Download Digital Lesson
Download Educator Guide

Malachi's Medication
In this activity, students will identify and explain the dosage instructions included on a prescription label and conduct an experiment to understand the importance of accurately measuring medication dosage.

Download Activity

Sarah's Sister
In this activity, students will meet Sarah and her younger sister who has gotten hold of medication that was not properly stored, to understand the importance of storing medication safely.

Download Activity
Middle School

**Our Brain and Body on Opioids**
How do addiction and withdrawal affect the body's many systems? Students examine how drug use alters the mind and body and reinforces their understanding by creating a peer-to-peer social media campaign.

- Download Digital Lesson
- Download Educator Guide

**Is our Community Influenced by the Opioid Epidemic?**
Students will examine why people turn to opioids and act as investigative reporters to consider the who, what, when, where, why, and how of opioid use and misuse.

- Download Digital Lesson
- Download Educator Guide

Middle School and High School

SELF-PACED MODULE

The Science of Addiction
The Stories of Teens

What is an Opioid
and how does it affect your body?

In this self-paced, standards-aligned e-learning experience, students meet teens who are struggling with prescription opioid misuse and heroin use and learn the science behind their powerful stories. With strategies and resources for those being faced with a decision about prescription opioid misuse or struggles with addiction, students become better equipped to handle these experiences.

LAUNCH MODULE  EDUCATOR GUIDE
Community Resources

Teachers – Operation Prevention

www.operationprevention.com

Educator Training

To help educators better prepare for conversations with students about the opioid epidemic, this webinar walks through Operation Prevention's vital resources and provides strategies to empower students and kick-start lifesaving conversations in the classroom.
Community Resources
Higher Education
www.campusdrugprevention.com

Campus Drug Prevention provides:

- Institutions of higher education and their surrounding communities with these resources to prevent drug abuse among college students.
- Promotes the importance of prevention and its role in helping ensure the health and safety of our nation’s colleges and universities.
